

# Denstone College Sibling Discount Policy

## Eligibility

A sibling discount of 10% of the applicable tuition fee (day or boarding) will be applied to the youngest child in a family with three children attending the College. If there are four or more children enrolled at the same time, the fourth (and subsequent) child will receive a discount of 15% of the applicable tuition fee (day or boarding).

## Conditions

The Sibling Discount is subject to the following conditions:

- The discount will cease to apply when the eldest child leaves the College, unless three or more siblings remain enrolled at the College at the same time.
- The discount will be withdrawn if the fee account for any child in the family remains in arrears for more than three months. Once withdrawn, the discount will not normally be reinstated.
- The discount is not available to families in receipt of a bursary, as the bursary assessment process takes account of family circumstances and affordability.
- The discount is not available where fees are paid, wholly or substantially, by a third party, including employers, local authorities, charities, trusts, or other sponsoring organisations.
- The discount is not available in conjunction with staff fee remission or any other fee concession, unless expressly approved by the Head or Bursar.

## Definition of Siblings

For the purposes of this policy, siblings are defined as:

- Children of the same parent or parents;
- Adopted children;
- Stepchildren who are members of the same household in a blended family.

The discount does not apply to grandchildren of different parents, cousins, or other extended family members. It also does not apply to our flexi boarding packages.

## Discretion

All fee concessions and discounts are offered at the discretion of Denstone College.

The College reserves the right to amend or withdraw this policy with effect from the start of any academic year. Any changes will normally be communicated to parents as part of the annual fees' information published during the Summer Term.
